Profile

I´m in my final year studying BSc. in Applied Computer Science and excited about pursuing a meaningful career in tech. I want to bring my leadership skills to a company and add diversity and value. I'm naturally curious and creative, and after I graduate in the summer of 2024, I'm ready to take on challenges in the tech industry. My goal is to be innovative, work well with others, and make a lasting impact. I'm eager to bring my proactive attitude and passion to make a real difference in this industry.

Computer Science Projects

1. *Bachelor Thesis* – NORTritious, Norfirma Project in Human Computer Interaction:
   January 2024 - Present
2. *Get To Know* August 2022.
- Initiated side project to create an educational website focused on impactful/inspiring individuals worldwide.
- The website is still in development; expected outcomes include an engaging platform for users to learn about influential people from various continents, fostering global awareness and knowledge sharing.
3. *Movie ticket* April 2022.
- Developed a movie ticket application as part of a web programming assessment using Spring Boot. I implemented both backend and frontend functionalities, allowing users to purchase movie tickets.
4. *Inclusive Web Design* September 2021.
- Final group exam in the unit "Inclusive Web Design", my team developed a comprehensive website and showcase our understanding of HTML, CSS and inclusive design principles acquired during the unit.
- Taking the lead on the "Topical", I aimed to showcase a unit that resonated with our team´s shared enthusiasm during our first year, and created responsive design, across various devices.
